

## On-Site Screening Toolkit

---

### Let's Train: Phase 1 Screening Protocol

- Coaches should wear PPE during all screening activities.
  - PPE includes cloth or disposable face masks
- Remind all participants to maintain physical distance requirements (6ft) during screening procedures.
- Be sure that all participants are wearing masks and appropriate PPE during all screening procedures
- There should be a single entry point and exit point for screening procedures. Participants should not be entering or exiting the space in multiple locations.
- Use physical guidance (ropes, tape on floor, chalked areas, coning off areas) to help ensure social distancing.
- Suggest to parents and guardians that they wait in their cars.
  - Family members and/or caregivers may need to drop off and pick-up only or stay in the car during practice or activities.
- Temperatures of all participants should be taken on arrival
  - Use thermometers (preferred thermal non-touch) to acquire temperature reading
  - If using thermal non-touch thermometers, take temperatures in a shaded area, away from vehicles and other objects that may release heat, to ensure accurate readings
  - If the initial temperature reading is high, retest after 5 minutes to ensure accuracy
  - If the participant's temperature is 100.4F or higher at the second test, the participant MUST be asked to leave the site.
- Record participant information in the COVID reporting roster
- Be sure to create a waiting area for participants after screening completed (minimum distance protocol should still be followed).
- Participants who are found to have COVID-19 symptoms must wait 7 days after symptoms resolve to return to activity OR must provide written proof of physician clearance to Special Olympics to return earlier.

### Post-Event Protocol

- If a COVID 19 case is suspected, report this information to the SOAR staff.
  - Be prepared to provide the Covid Reporting Roster for the event
  - Any public comments will be made by SOAR communications team
