

Our Toolkit for Moving Forward with Safety in Mind!

Information on COVID-19 is changing daily. Transmission rates vary across the state. The Special Olympics Arkansas staff will continually monitor this ever-changing situation and adjust decision-making accordingly while adhering to the guidance contained herein. **The Special Olympics Arkansas Health Team, Jennifer Stane, Coordinator of Wellness and Coach Advancement and Camie Powell Director of Marketing and Partnership, are the official COVID-19 point-persons to keep current on all compliance requirements, coordinate response and monitor for COVID-19.**

Throughout this document “**participants**” are defined as all athletes, Unified partners, coaches, volunteers, family members, caregivers, staff or others in attendance of an activity.

These are intended as minimum guidelines as we are returning to activities. **It is intended to supplement – not replace – any state/provincial, local, territorial/national or tribal health and safety laws, rules and regulations with which similar organizations must comply.**

Additionally, the information in this document is not intended or implied to be a substitute for professional medical advice, diagnosis, or treatment. The knowledge and circumstances around COVID-19 are changing constantly and, as such, Special Olympics makes no representation and assumes no responsibility for the accuracy or completeness of this information. Further, you should seek advice from medical professionals and/or public health officials if you have specific questions about symptoms and/or diagnoses related to COVID-19.

Guiding Principles

1. The health and safety of all members of the Special Olympics movement is paramount.
2. Beyond a sports organization, Special Olympics is a movement for and by people with intellectual disabilities (ID), and its guidance must be inclusive and directed at the unique needs and abilities of people with ID.
3. Guidance is based on current medical and public health information available at the time of publication. As knowledge of COVID-19 is changing rapidly, guidance will continue to evolve.
4. Guidance takes a phased approach that is dependent on local transmission rates, and testing/monitoring/contact tracing/health system capacity.

Special Olympics
Arkansas

Our Approach

Special Olympics Arkansas is launching a three (3) phased approach to return to activities. **It is important to note there may be times a community will revert to an earlier phase if and when the spread of infection rises in the future.**

The SOAR staff will re-evaluate the current environment and phase every 3-4 weeks. Phase status will be announced via email by Special Olympics Arkansas.

If participants have tested positive and/or been diagnosed with COVID-19, the participant must provide written proof of clearance from their healthcare professional prior to returning to sport or fitness activities.

Special Olympics Arkansas SO Ready Phases

What is available now?	Phase 1 Let's Train Size of gatherings <10 people	Phase 2 Let's Compete Size restrictions on gatherings are increased to <50 people. *May be subject to change at any time	Phase 3 Let's Go! (cautiously) No restrictions on size of gatherings and public facilities are open.
